

Road Safety Policy

This **Road Safety Policy** constitutes the foundation in our work in becoming one of Sweden's most safe transport and logistics companies. We strive to be perceived as model in the traffic by the customers, our employees, and the other traffic participants by the following:

- Always offering missions and planning the transport so that we would never violate the current laws and regulations as well as respect our Road safety policy.
- Our vehicles must always be driven in road-safe conditions through regular service and maintenance as well as vehicle inspection before driving and routines to always load correctly and secure the load according to current regulations.
- We involve and continuously train all employees in Road Safety issues.
- Our employees have the competence, authorization and health required to drive our transport vehicles in a traffic-safe manner.
- Each employee must show personal responsibility for his own safety and that of the other road users by following our road safety rules and pointing out improvements and deficiencies for prompt correction.
- We must always improve Traffic Safety through Employee Improvement Proposals, systematic Traffic Safety work and through annual internal control and audit.
